1978 SUBJECT INDEX

Asterisk indicates abstract

Abdomen
see also specific organ
abscess, autologous, Ga-67 leukocyte uptake, in rabbits, 229*
abscess, Ga-67 citrate imaging, ultrasound, 861
abscess, gas containing, ultrasound, 1099*
ascitic fluid volume, I-125 HSA, Tc-99m HSA, -phytate colloids, in mice, 1138
disease diagnosis, computed tomography, ultrasound, 338*
duplication cyst, $^{99m}TcO_4^-$ scanning, 659*
ectopic gastric mucosa, $^{99m}TcO_4^-$ studies, in children, 691*
emission computed tomography, Tc-99m, 683*
Ga-67 citrate imaging, bowel activity, 69, 733*, 1214
Ga-67 citrate scan, photon-deficient lesion, 118
Ga-67 citrate scan, seven day, 733*
Ga-67 citrate uptake by peritoneum, in pancreatitis, 1266
infection evaluation, Ga-67 citrate scanning, computerized axial tomography, 262
intracavitory P-32 chromic phosphate therapy, 693*
malignant ascites, ultrasound, 231*
mass, effects on inferior vena cava, ultrasound, 1192*
mass localization, ultrasound, 125*
mesothelioma staging, Ga-67 citrate, 692*
necrotizing enterocolitis in newborns, Tc-99m diphosphonate imaging, 691*

trauma, Tc-99m S colloid imaging, 686*
ultrasound guidance of fluid-containing mass drainage, 870*
Abscess
abdomen, Ga-67 citrate imaging, $^{99m}TcO_4^-$ bowel location, 69
abdomen, Ga-67 citrate imaging, ultrasound, 861
abdomen, Ga-67 citrate scanning, computerized axial tomography, 262
abdomen, gas containing, 1099*
drainage, ultrasound guidance, 870*
Ga-67 citrate distribution, effect of Desferol, in rabbits, 732*
Ga-67 citrate scanning, 69, 262, 734*, 861
Ga-67 citrate tomography, 1074
imaging, double-tracer subtraction, Ga-67, Tc-99m, 1297
In-111-oxine-leukocyte imaging, 557, 672*, 742*
liver, ultrasonography, 125*
subphrenic, simulation by gastric distention, 438
uptake, autologous Ga-67 leukocytes, in rabbits, 229*
Adrenal glands
comparison of iodocholesterol and iodomethylnorcholesterol, 333, 334, 677*
cyst, [^{123}I]-iodomethylnorcholesterol imaging, ultrasound, 1092
F-18-dihydrotestosterone analog, preparation, distribution, in rats, 702*
I-125-enzyme inhibitor uptake, in dogs, 677*
[^{125}I]-iodomethylnorcholestenol, -iodocholesterol, distribution, in dogs, 660*
[^{131}I]-iodomethylnorcholesterol, radiation dosimetry, 682*
imaging, dexamethasone suppression, in normals, [^{131}I]-iodomethylnorcholesterol, 677*
imaging, normal asymmetry, [^{131}I]-iodomethylnorcholesterol, 149
imaging, radiolabeled enzyme inhibitors, 200
myelolipoma, ultrasound, CAT, 981*
nonfunctioning adenoma uptake of [^{131}I]-iodocholesterol, 458
subcellular distribution of [^{131}I]-iodocholesterol, in rats, 458
ultrasound, neoplasm, 1192*
Adverse reactions
bovine TSH, 284, 1183
SNM Drug Problem reports, 116
Aerosols
compared to Kr-81m, Xe-133 for inhalation lung studies, 676*
deposition, carrier gas effects, 676*
dry, $^{99m}TcO_4^-$ system, compared to nebulizer, 1088
imaging in chronic obstructive pulmonary disease, 675*
$^{99m}TcO_4^-$, Tc-99m DTPA, pulmonary ischemic lesion imaging, 567
Aerosol
Tc-99m S colloid, evaluation of bronchial mycolytic agents, 445*
Tc-99m sebacate, preparation, lung imaging, in dogs, 675*
Alcoholism
cirrhotic liver, ethanol effect on C-13 galactose oxidation, 679*
liver imaging patterns, Tc-99m S colloid, 154
Algorithm *see Computer; Data processing*
Allergy
adverse reactions to radiopharmaceuticals, 116
ragweed antigen E radioimmunoassay, 446*
reaction to bovine TSH, 284
Alpha-1-fetoprotein
liver tumor screening, 1096*
Amino acids
see also Carbon-11
aliphatic, C-14, I-125, preparation, distribution, in rats, 393
Angiography, radionuclide *see specific organ*
Angiotensin I
radioimmunoassay, 747*
Animals
see also Model
species differences, heart uptake of N-13 asparagine, 701*
Antibody
see also Radioimmunoassay
-antigen binding, scintillation proximity assay, 681*
-antitumor-I-131, preparation, kidney tumor scanning, 427
I-131, occult infection imaging, in rabbits, 687*
Argon-37
in vivo Ca measurement, physiologic effects, 54
Artifacts
scintillation camera, high photon fluence, 407
stomach uptake, bone scans, Tc-99m diphosphonates, 974
Autoradiography
bone, Tc-95m, Tc-96 pyrophosphate, in rabbits, 895
Bacteria
see also Infection
Lactobacillus casei, radiometric assay of folates in plasma and erythrocytes, 906
myco-, fatty acid metabolism radioassay, 696*
radiometric assay, replication time in culture, C-14 glucose metabolism, 619
Staphylococcus aureus uptake of Ga-67, 44
Bladder
function studies, I-131 hippurate, 720*
quantitative emission computed tomography, 682*
tumor, Ga-67 citrate scanning, 470
ultrasound, symptomatic pelvic mass, 231*
ultrasound, water enema, 1192*
Bleomycin
see also Indium-111; Iodine-123
I-, distribution normality, liver, lung, tumor, in mice, 688*
serum pharmacokinetics in renal disease, radioimmunoassay, 337*
Blood
see also specific organ, blood flow; Thrombus; Vascular system
anemia, effect on Ga-67 citrate distribution, in rats, 715*
anemia, pernicious, serum folate effect on Vitamin B_{12} excretion, 1281*
autoimmune haemolytic anemia, spleen-to-liver Cr-51 RBC ratio, 124*
clearance rates, I-125, Tc-99m HSA, in dogs, 1142
clot, in syringe, I-125 fibrinogen, 563
clot *see also Thrombus*
^{11}CO inhalation imaging, vascular system, 709*
Ga-67 transferrin binding kinetics, 1245
leukocytes *see Indium-111, leukocytes; Leukocytes*
lymphocytes *see Lymphocytes*
neutrophils *see Neutrophils*
plasma protein, I-125 cold insoluble globulin, preparation, damaged tissue uptake, in rats, 732*
plasma volume, Tc-99m HSA, 804, 858
platelets *see Indium-111, Platelets; Platelets*
Pt-195m-Cis-platin binding, 732*
sickle cell anemia, Tl-201 imaging, 708*
sickle cell disease, bone imaging, in children, 698*
Bone
anatomy, book review, 1095
autoradiography, Tc-95m, Tc-96 pyrophosphate, in rabbits, 895
blood flow, Tc-99m diphosphonate uptake, in dogs, 705*
Crohn's disease, quantitative sacroiliac uptake, Tc-99m pyrophosphate, 1280*
density measurement, Compton scatter, Cs-137 source, 573*
F-18 kinetics, 5 compartmental model, 688*, 1301

femoral head, quantitative uptake of Tc-99m phosphates, Perthes' disease, in children, 229*, 884
hypercalcemia, parathyroid hormone, calcitonin, 25-hydroxy-vitamin D levels, 1225
metabolic diseases, Tc-99m phosphate quantification, 330
metabolic disease, whole body retention of Tc-99m diphosphonate, 271, 1273
metastases from prostate carcinoma, P-32 diphosphonate therapy, 98
Paget's disease of skull, brain perfusion study, 197
Tc-99m agents, structural requirements, 695*
Tc-99m carbamyl phosphate analogs, preparation, distribution, 530
Tc-99m disphosphonate analogs, preparation, distribution, in animals, 695*
Tc-99m diphosphonate, -methylene diphosphonate binding, 740*
Tc-99m monophosphate, preparation, distribution, in animals, 1027
Tc-99m polymethylene diphosphonates, preparation, distribution, in animals, 1151
tomography, F-18, skull, in dogs, 707*
ultrasound, spine and pelvis tumors, 1282*

Bone imaging
dental diagnoses, Tc-99m diphosphonate, 845
fibrous dysplasia of skull, Tc-99m diphosphonate, 979*
fracture healing analysis, 1356
fracture healing, Tc-99m methylene diphosphonate, in animals, 1320
Gaucher's disease, Tc-99m methylene diphosphonate, 1333
inflammation, double-tracer subtraction, Ga-67, Tc-99m, 1297
magnification techniques, 684*
metabolic disease, Tc-99m phosphates, 330
nuclear medicine contribution, 579
osteomalacia, Tc-99m diphosphonate, 245
osteomyelitis diagnosis, Tc-99m pyrophosphate, 696*
osteomyelitis, In-111-oxine-leukocytes, 742*
osteomyelitis staging, Ga-67 citrate, Tc-99m pyrophosphate, 696*
osteomyelitis, Tc-99m diphosphonate, in children, 706*
Paget's disease, E.H.D.P. and calcitronin therapy, 706*
pediatrics, 324
quantitative, arthritis, Tc-99m pyrophosphate, 705*
quantitative, mandibular graft, Tc-99m diphosphate, in dogs, 706*
renal osteodystrophy, Tc-99m diphosphonate, 1289
sickle cell disease, Tc-99m pyrophosphate, in children, 698*

Bone scanning
breast cancer staging, Tc-99m phosphates, 658*, 979*, 1098*
brown tumors in renal osteodystrophy, 1146
chemodectoma, family screening, Tc-99m diphosphonate, 659*
comparison of Tc-99m diphosphonate and -pyrophosphate, 161
disc space infection, Tc-99m diphosphonate, Ga-67, 384
effect of Sn in Tc-99m pyrophosphate, 565
extremities, tumor, 697*
joint, prosthetic implant, Tc-99m pyrophosphate, 697*
knees, osteonecrosis, Sr-85, Tc-99m diphosphonate, 445*
